NOTE: Above corrects some numbers from Issue 273.

CLIPPERTON UPDATE

(FROM W6SZN): The expedition to Clipperton Island will take place in April. Thoroughly frustrated by the failure of the boat we had chartered in 1984, we have this year arranged for transportation which, though very expensive, is virtually guaranteed to get us to the island and back, safely and on schedule. We will arrive Clipperton Apr 3 and stay 7-8 days.

Operators confirmed so far are W6SZN, W6OAT, W6RGG, N6GJ, KK6X, N7NG, K3NA, WA7NIN, F6GXB, F9LX, DJ9ZB, TI2CF, XE1ZZA, JG3LZG, FO8HLK, and FO8GW. Transportation will be on the "Royal Polaris, a 115-foot sport fishing vessel out of San Diego. The boat and its owner and crew have been to Clipperton several times.

We expect to receive callsign(s) for the expedition momentarily. QSLs will be through the YASME Foundation, Box 2025, Castro Valley CA 94546. We will have at least three stations on the air 24 hours a day, and there is some chance we will be on RTTY, Oscar, and 6 Meters.

The cost per operator for this expedition is approximately \$3500; those who had signed up in 1984 are out of pocket even more. Contributions which had been made for the 1984 operation were returned to the contributors. We are keeping records again this year and if, for any reason, the operation does not take place, contributions will again be returned. Send what you can now to the No. Cal. DX Foundation, in care of Rusty Epps, W6OAT, 948-H Kiely Boulevard, Santa Clara CA 95051.

GOLDWATER SENATE RESOLUTIONS SUPPORT PRB-1

Barry Goldwater (R-Ariz.), K7UGA, introduced two Resolutions in the U.S. Senate on January 3, both of which could help FCC's PRB-1 be approved. Resolution 35, according to the W5YI Report, dealt with the rights of homeowners to erect satellite TV receiving dishes, and it calls upon the FCC to announce that local governments should not discriminate unreasonably among satellite dish owners and other types of home communications reception antennas. Goldwater said "This provision would meet the challenge being presented by some cable companies who are trying to insulate themselves from competition by hiding behind local restrictions on Earth stations."

Resolution 36, related specifically to amateur radio antennas, urges the FCC to protect its amateur radio licensees against unreasonable restrictive land use and other State and local regulation which would render the communications from such stations impossible or unreliable. In other words Resolution 36, while it is non-binding on FCC, urges the Commission to approve PRB-1.

According to the ARRL Letter, the Department of Defense has filed reply comments in support of PRB-1, saying "The Department of Defense respectfully supports the request of ARRL that the Commission (FCC) issue a declaratory ruling delineating the limitations of local zoning and other local and state regulatory authority over federally-licensed amateur radio facilities."

The Department of Defense cited the invasion of Grenada in October 1983 as an example of the utility of amateur radio; it should be remembered that when government (military) communications out of Grenada failed during the invasion, the departments of State and Defense were getting their information from J37AH and KA2ORK/J37. And news outlets in the States were getting their information from amateur radio operators who monitored the transmissions.

As for the Goldwater resolutions, sources have told TDXB that the senator was convinced to make the resolutions by a Washington attorney and congressional staff member who is also a ham. It is reported that the trade-off for the resolutions was that ARRL make the District of Columbia a separate multiplier in their contests. They did that several months ago. The only active station in the District is W3USS, the Capitol Hill Amateur Radio Society.

THAILAND LIFTS AMATEUR RADIO BAN

It has been reported that the Minister of Communications lifted, as of Jan. 16, the ban on amateur radio in Thailand. The Radio Amateur Society of Thailand has been working on this for several years; last November's HSOA demonstration station, coinciding with the Society's 20th anniversary, plus a meeting between Society officers and government officials, were apparently influential in swaying the telecommunications officials.

The King of Thailand is apparently interested, and has been heard on the Bangkok 2-Meter repeater (which has been monitored by the government 24 hours a day).

ARRL ISSUES DXCC "WHITE PAPER"

In response to orders from their Board of Directors, the ARRL Communications Department has issued a document which traces the addition of "countries" to the DXCC List since WW 2. Sources who have seen the paper, which has not yet been made public, say it provides great insight into how DXCC thinking has evolved, especially in the 1950's and 60's. The paper is called an "impressive piece of research" and sources say it might be the guide needed to further clarify the Criteria.

The final case outlined in the DXCC white paper is that of the Alaska DX Association's request for status for the Pribilof Islands; the Headquarters research indicates that they should not receive DXCC status.

Headquarters has indicated privately that they might be receptive to a relaxing of the Criteria on a "geomorphological" basis, i.e., an island or piece of land could be considered if expert proof showed that it was different from the "mother DXCC country" by virtue of geological differences. It seems certain that the Pribilofs would qualify under such criteria.

ANOTHER REPORT FROM CHINA

(W7LFA) I spent the month of November in China on business, on an engineering lecture and technology interchange program (which includes) most of the country. Since we were working for a level of government with some influence, the radio club stations were available whenever we wanted to operate. I will be working with them for several years since my company (Boeing) has been asked by the U.S. government to assist them in several technology pursuits.

BY1PK and BY4AA are both set up with operating equipment and antennas for 80 through 10 Meters. Their operating is mostly CW due to language barriers but a few of the operators are starting to get brave and venture into SSB (using "crib sheets"). I operated SSB and found the Japanese equipment working well. You will be seeing increased emphasis on low band operating, and since it is so easy to get to China from Japan I am sure we will be seeing more guest operating by the Japanese.

I discussed the possibility of operating a contest from there, as I am convinced that the time could be arranged. As TDXB has reported, the Chinese still do not understand the concept of contest operating. I operated "contest style" and I could tell they were perplexed.

Looking at their guest book, it is evident they are deluged with visiting hams from around the world. The Chinese are gracious hosts and it is a pleasure to meet amateur radio fraternity people like them.

One of my primary reasons for visiting the Beijing and Shanghai stations was to present them with the Western Washington DX Club TOTEM award. I had delivered the very first TOTEM award to 9X5NA in Rwanda, so it was a thrill to take these to China.

Finally, the China stations are still honoring requests (in writing) for schedules...some of these requests were in evidence on the station's bulletin boards. Schedules should be realistic regarding propagation. If it is a good time for contacts into Japan, it should be good for China, too.

KX6DS MARSHALL ISLANDS REPORT

(KX6DS) I've now completed a full year of operating with 30,000 contacts, 70 percent CW, broken down as follows: 80 meters, 5 percent; 40 Meters, 29 percent; 20 Meters, 25 percent; 15 Meters, 35 percent; and 10 Meters, 6 percent.

Continent breakdowns are Japan, 43 percent; North America, 32 percent; Europe, 14 percent; South America, 2 percent; Africa, less than 0.1 percent; others, 9 percent.

I do not expect to make as many contact in 1985, mostly due to band conditions. I will continue to operate mostly CW, and with increased emphasis on 160, 80, and 40 Meters. All QSLs must go to North Alabama DX Club, PO BOX 4563, Huntsville AL 35815.

BRIEF NOTES

Until Feb 15 a series of USSR expeditions is taking place...RT5UY/UI Uzbek has already been worked. Look for RT5UL/UJ Tadzhik, and UB5UBW/UM Kirghiz. QSL all to UT5AB (according to the ARRL bulletin)...The Mexico DX Club will operate XF4MDX from Revillagigedo Islands Mar 7-9, 80-10 Meters and 160 if time permits...In addition to Honor Roll plaques now available, Honor Stickers for your DXCC certificate will also be available shortly...nothing heard yet from DJ6SL/5V; Baldur was supposed to be in Togo until mid-month. Best spot to find him would probably be low-band CW...JW6VDA is trying 40 Meters, on 7080 at 0100, listening 7250 and up...

Minnesota's Twin Cities DX Club, which got some bad press in Worldradio a couple of years ago (because they "screen" new members), has added about 15 new DXers in the past year. The club reports hearing from a number of DX groups who wish they had had such a screening process to keep some of their current members out!

Off to Anguilla Feb 13-Mar 5 are AD8J (VP2ED), KJ0D (VP2EAG), and K8CV (VP2ES); they will be using the VP2 calls during the contests (ARRL Phone and CW) but will have to use their U.S. call signs/VP2E outside of the contests...HB9TL will be /PJ4 Bonaire Mar 5-22, on .019, .144, .194, and .275 on each band. He'll be on 40 and 80, antennas permitting...

DX Newssheet says H44SH and ZD9CC are due to leave their respective islands shortly...DX Report has PY1BVY/PY0T active Feb 8-10 on CW only, including 160...ZC4MR is believed to be the only station active from either of the British Cyprus bases; he likes the 14.225 net at 1600Z on Monday and Friday, will work CW on request...W9GW said to be going to Sri Lanka sometime after Feb 17, CW only, concentrating on 40 meters (DX Report)...QRZ DX says Maldives on tap by the Japan Ladies Radio Society Feb 12-16, 160-10, QSL JA1AEQ...WD9GQV left Pitcairn (VR6BR) around Jan 23; we had only a handful of reports on her operation...

FIVE YEARS AGO IN THE DX BULLETIN

February 11, 1980) K5CO, N5AU, AND N2KK were in Africa, awaiting licenses...word was that N2KK would go to Reunion by himself (he had a French license). Active were TZ4AQS, TL8JM, WD8QGQ/KH7. It was now possible to operate from South Africa, even though no reciprocal agreement existed (and still doesn't, in 1985, but will soon). K3ZO was still at HS1ABD, having very little success on 80 Meters, but kept trying. HS1WR, now deceased, was putting up a 2-element beam for 40. We reported that putting the new Drake L-7 amplifier on 10 Meters was a pretty difficult job, compared to how others such as ETO had handled the FCC-induced problem. Drake is now out of the amateur market entirely.

6Y5NR ANNOUNCES NAVASSA EXPEDITION

A KP1 Navassa operation April 3-9 will include 6Y5HN, 6Y5FS, G3RFS, and K2SG (on CW), and 6Y5NR, 6Y5IC, 6Y5KC, KP2A, N2EDF, and 6Y5CA (on SSB). Three separate stations will be active most of the time, with amplifiers and beams. The group will leave Kingston, Jamaica, Apr 3, on the "High Isle," a 78-foot fishing boat, and the operation should commence around 1800Z April 4.

Verbal permission from the U.S. State Department has been granted; when paperwork is finalized the group will notify State, which will in turn notify the Coast Guard. Assisting in logistics has been 6Y5MJ, who arranged the 1982 Navassa expedition, and 6Y5LA, who organized expeditions there in 1969 and 1973.
